PREMIUM PADEL COURTS

PREMIER
PADEL

OFFICIAL COURT

2024-2026

PREMIER PADEL

Premier Padel 2024-2026

Official court for Premier Padel

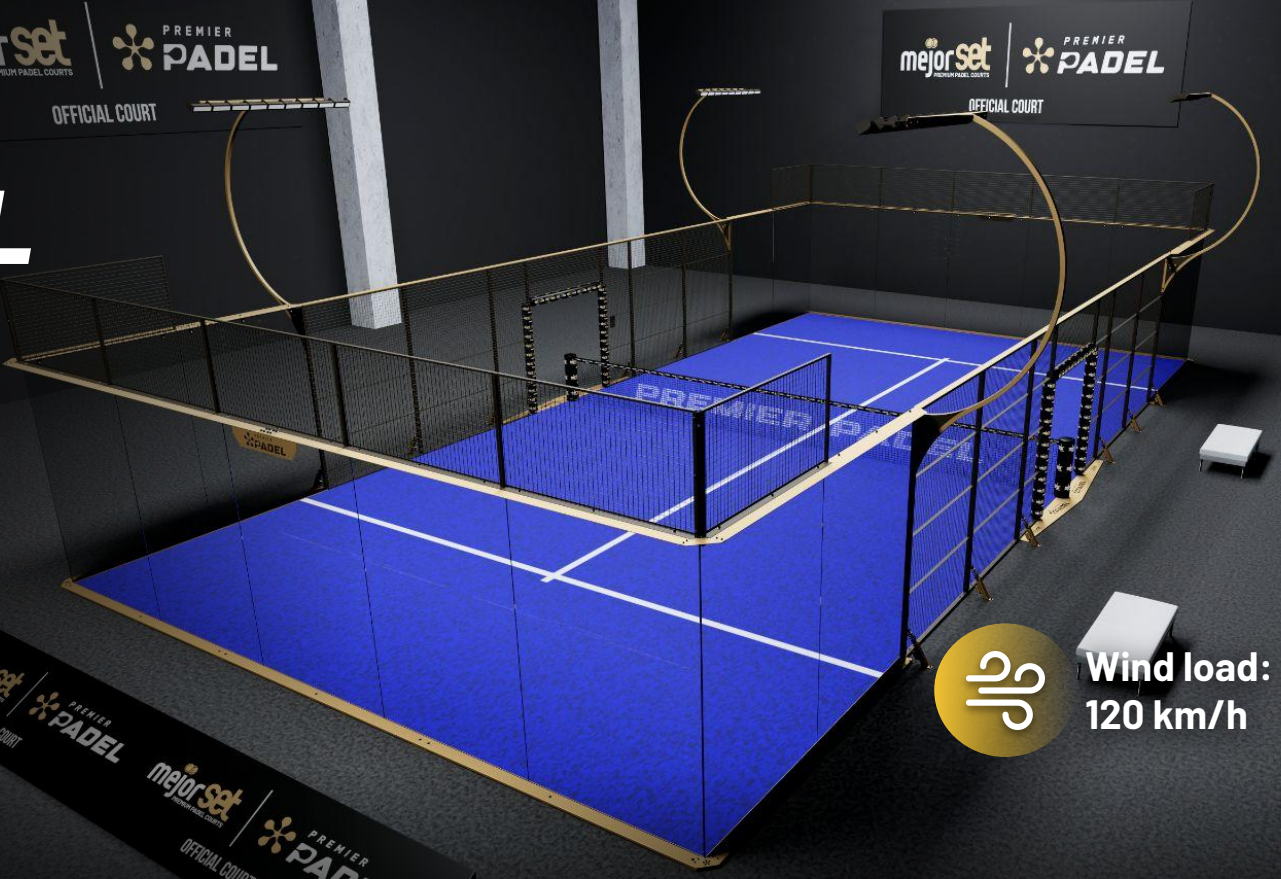

Special Edition **PREMIER PADEL**

The most premium Padel Court has arrived.

A unique Full Panoramic court redesigned with Premier Padel colors and branding.

The court that ensures maximum visibility during the game, with an exclusive design of lamp post in the shape of a half padel racket, court numbering to offer the sensation of a limited edition and with the innovation of the Shock Lock system invented by MejorSet, especially for the improvement of the playability in tournaments.

 Wind load:
120 km/h

Designed for top projects

A Limited Edition with serial number, created for both indoor or outdoor projects, with the option to be primed for extreme outdoor conditions.

Portable or fixed

This court model can be fixed or portable. The portable option allows the installation on other sports facilities.

Anti-injury system

Covered mesh to create a safe playing arena and protect the glass

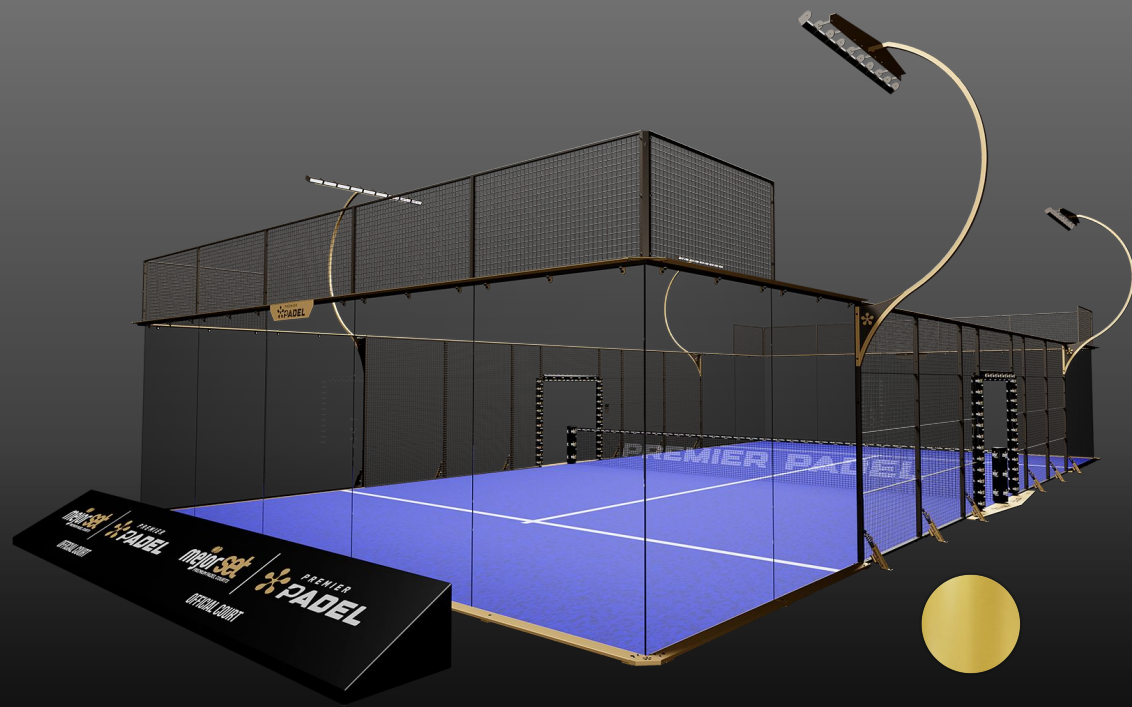

Laser cut technology

Designed to allow moisture egress and oxidation.

Special Edition by **PREMIER PADEL**

Two colors available: Golden and Black

Protection and covers

Included net protectors with custom logo, entry cover and entrance plate or carpet with Premier Padel branding.

Turf

Special Edition Textured turf of 10mm designed by MONDO, ensuring the best grip and playability or monofilament turf for extreme heat conditions.

Glass and corners

12mm of tempered glass that provides total visibility and resistance to the most demanding game.

Structure

Galvanized steel structure with epoxy paint certified with QUALICOAT, in black or Premier Padel gold color. Optionally it can have two-coat pure epoxy priming for extreme conditions and coastal areas.

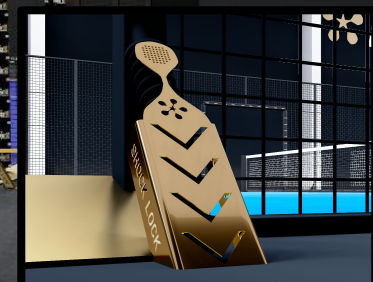

Lighting

New exclusive design of lamp post emulating half a padel racket.

Eight linear LED spotlights of 200W each, featuring the most premium lighting, with a curved lamp post design by MejorSet.

Shock Lock

Shock absorption system. It blocks vibrations in the structure at the moment of player impact, and extends the useful lifetime of the court.

OFFICIAL COURT

2020-2024

INTERNATIONAL
PADEL
FEDERATION

FIP 2020-2024

Official court for the International Padel Federation

FIP Official Court

Highest standards and exclusive design

Designed to set the highest quality standards in the game and provide maximum visibility while maintaining a disruptive design with the FIP's official colours and logo.

OFFICIAL COURT

Features

- Court measurement 10x20m
- 12mm tempered glass
- Anti-injury folding mesh system
- Galvanized steel structure with QUALICOAT® paint coating.
- Lamp posts with a unique design for this model. 8 x 200W LED lighting of the latest generation.

- 10mm texturized artificial turf or 12mm monofilament for high temperature environments.
- Exclusive FIP and MejoSet logo on the structure, protectors and netting pole, as entrance trim.
- Exclusive Structure Color Blue RAL 5026

Customization Options

- Turf color options
- Premium LED lighting

Extra

- Two-coat pure epoxy primer for coastal and high-temperature environments
- Installation services
- Worldwide transportation and logistics services
- After sales service

Turf

Top turf used in the best tournaments, textured of 10mm, to guarantee a perfect bounce and grip of the foot.

Distinctive logos and customized corners

Exclusive lighting

200W LED lightning. FIP Limited Edition design with it's logo.

Glass

12mm of tempered glass that provides total visibility and resistance to the most demanding game.

Protection and covers

Includes protectors and net post with FIP logo, and entrance trim.

UNIQUE AND LIMITED EDITION

FIP Official Court

Full Panoramic

The Official Court used for the best tournaments of Premier Padel and FIP

The Full Panoramic court, without corners (pillars), recognized as the best padel court due to the clean view it provides and the most avant-garde design.

Winload:
120 km/h

Features

- Court size 10x20m
- 12mm tempered glass
- Anti-injury folded mesh system
- Galvanized steel structure with QUALICOAT® paint coating.
- Latest generation LED lighting 8 x 200W
- Textured turf of 10mm, MONDO SuperCourt or Italgreen Padel Pro. Monofilament option available for heat environments.

Customization Options

- Single padel court 6mx20m
- Light posts design (curve, straight or Z)
- Turf and structural elements colour options
- Included entry and net protectors personalized with clients logo
- Included entrance plate with MejoSet's logo

Extra

- Two-coat pure epoxy primer for coastal and high-temperature environments
- LED lighting premium LED Project
- Installation services
- Global shipping and logistics services
- After-sales service

PORTABLE SYSTEM

Portability

Optionally this court can integrate a ring of portability, it does not require screws to anchor it to the ground.

Ideal for events or to install it in an area where it is not possible to drill holes. Example: on top of a tennis court.

Winload:
95 km/h

Turf

The highest quality 10mm textured turf used in official tournaments, that ensures the best grip and playability.

Structure

Galvanized steel and epoxy paint certified with QUALICOAT, in all the possible colors.

Lighting

3 different options for the shape and personalization on the colors of the lights structure.

Choose between different spotlight models according to the light intensity required for your project.

Glass and corners

12mm of tempered glass that provides total visibility and resistance to the most demanding game.

Protection and covers

Includes net protectors and custom net post and official MejorSet logo entrance plate.

360°
BEST FOR VISIBILITY

Full Panoramic

Ensuring the best glass fixation

Why We Don't Use Corner Brackets

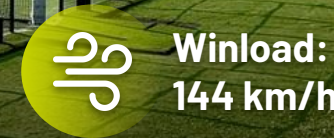

At MejorSet, we prioritize safety and durability. That's why we choose not to use corner brackets for our glass installations on Full Panoramic and Premier Courts. Instead, we use a proven polymer solution, offering several key advantages:

- **Enhanced Safety:** By eliminating the need to drill holes in the glass, we significantly reduce the risk of cracks and breaks, ensuring the glass remains impact-resistant.
- **Long-Term Durability:** Our polymer maintains its integrity over time, even in outdoor installations, providing reliable support and stability.
- **Proven Track Record:** Our extensive experience with this method has consistently demonstrated its effectiveness and reliability.

Panoramic RC10

High performance and panoramic view

With corners added to the Full Panoramic version, it allows full customization with more color. It complies with the specifications of the International Padel Federation.

Features

- Court size 10x20m
- 12mm tempered glass
- Anti-injury folded mesh system
- Galvanized steel structure with QUALICOAT® paint coating.
- Latest generation LED lighting 8 x 200W
- Textured turf of 10mm, MONDO SuperCourt or Italgreen Padel Pro. Monofilament option available for heat environments.

Customization Options

- Single padel court 6mx20m
- Light posts design (curve, straight or Z)
- Turf and structural elements colour options
- Entry and net protectors personalized with clients logo
- Entrance plate with MejorSet's logo

Extra

- Two-coat pure epoxy primer for coastal and high-temperature environments
- LED lighting premium LED Project
- Installation services
- Global shipping and logistics services
- After-sales service

Turf

Textured or straight turf, 12 or 10mm, to guarantee a perfect bounce and foot grip.

Structure

Galvanized steel with QUALICOAT certified epoxy paint, in all possible colors. Possibility of marine primer for coastal environments.

Lighting

3 different options for the shape and personalization on the colors of the lights structure.

Choose between different spotlight models according to the light intensity required for your project.

Glass and corners

12mm of tempered glass that provides total visibility and resistance to the most demanding game.

THE BEST VALUE FOR MONEY

Protection and covers

Option of customization in protectors and net post, and entrance plate.

Panoramic RC10

mejor
PREMIUM PADEL COURTS

V-PRO Classic

Classic and quick installation

The classic model of padel courts redesigned to provide maximum modernity, visibility and comfort.

Ideal for first contact with padel, and clubs that need to have the minimum maintenance, cost control and profitability.

Ideal for both indoor and outdoor courts.

Winload
120-150 km/h

Features

- Court size 10x20m
- 10mm tempered glass
- Galvanized steel structure with QUALICOAT® paint coating.
- Anti-injury folded mesh system
- 8 x 200W LED lighting of the latest generation.
- Monofilament 12mm high-quality artificial turf

Customization Options

- Single padel court 6mx20m
- Light posts design
- Turf colour options
- Structural elements colour options
- Entry and net protectors personalized with clients logo
- Entrance plate with MejorSet logo
- Increased thickness of the structure for extra winload resistance

Extra

- Two-coat pure epoxy primer for coastal and high-temperature environments
- LED lighting premium LED Project
- Installation services

Winload:
265 km/h - 165 mp/h

Turf

Textured or straight turf, 12 or 10mm, to guarantee a perfect bounce and foot grip.

Anti Corrosive primed with zinc tubular top ring to ensure the court is hurricane-resistant.

Glass

Withstand wind gusts of up to 265 km/h or 165 mph with 15mm tempered glass.

Various types of lighting

200W LED lighting. 3 different options for the shape and personalization on the colors of the lights structure.

Choose between different spotlight models according to the light intensity required for your project.

Glass fixation

2.5mm Magnelis carbon steel sheet, coated on both sides with a zinc-aluminum-magnesium alloy, to ensure the fixing of the crystals to the ground.

Protection and covers

Customization in protectors and net post included, and entrance plate.

Xtreme Court

Maximizing Space: The Single Court

Introducing 1vs1 individual courts, a perfect solution for clubs looking to maximise their space. These courts, measuring 20x6 meters (approx. 65.6x19.7 feet), offer numerous benefits:

- **Space Efficiency:** Ideal for clubs with limited space, allowing more courts to be installed within the same area.
- **Versatility:** Perfect for training sessions, practice drills, and friendly competitions.
- **Cost-Effective:** Lower maintenance costs due to smaller court size, while still offering a high-quality playing experience.

Option available for all models excluding the X-Treme.

PAINTING AND PRIMING

Up to two different personalized colours*

QUALICOAT- certified finish

The metal components are coated with a thermosetting powder paint formulated with polyester resins. This QUALICOAT-certified coating, in the customer's desired color, provides these elements with excellent resistance to corrosion and UV rays, as well as high resistance to mechanical impacts.

All our courts come standard with a C4 resistance class once they have been primed and painted in our factory. This means medium-high resistance to water and humidity, making them ideal for both indoor and outdoor environments.

COATING (C5)

PRIMING (C4)

PRE-TREATMENT

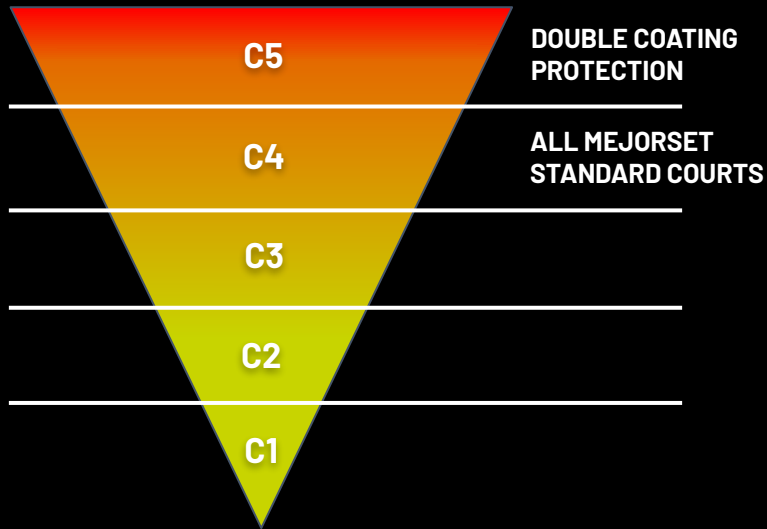

FOUNDATION

Double Coating

After double priming or galvanizing, a C5 paint grade is achieved, ensuring complete impermeability and resistance to the most extreme conditions, including coastal and salty environments.

*FIP Official Court and Premier Padel Limited Edition come with predefined colors

PAINTING AND PRIMING LEVELS OF RESISTANCE

All our padel courts have an estimated durability of **15 years of corrosion protection**, in accordance with the QUALISTEELCOAT homologated class.

The grade is applied on the basis of resistance to the number of hours of exposure to saline environments.

CORROSIVITY CATEGORY	ENVIRONMENT EXAMPLES	
	EXTERIOR	INTERIOR
C5 Very High	Ideal for coastal environments and areas of high humidity and aggressive atmosphere and high salinity.	
C4 High	Ideal for all outdoor installation with standard conditions (not extremely rainy, or coastal areas)	Ideal for all interiors.
C3 Medium	Inshore areas of low salinity.	Production hall to facilities humidity and certain air contamination e.g. foodstuff plants, laundries, breweries, dairies.
C2 Low	Atmospheres Contaminated to a small extent, mainly rural regions.	Buildings which are not heated, where condensation may occur e.g. storage facilities, sports halls.
C1 Very low	-	Heated buildings with a clean atmosphere such as offices, shops, schools, hotels.

MONDO PREMIER SUPERCOURT® X3

DTEX: 8.200

HEIGHT : 10 mm

INFILL: Sand

FIBER TYPE: Textured monofilaments XNOVA in a parallelepiped shape with concave sides, characterized by 4 grooves and 4 asymmetric ribs as side reinforcements, textured monofilaments XOMEGA with a semicircular structure, triangular monofilaments XDELTA, with silica sand infill.

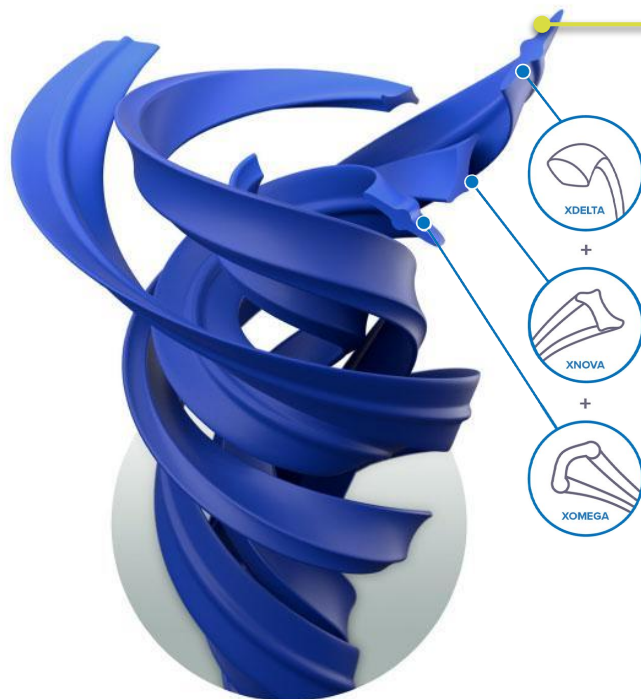

OFFICIAL TURF OF THE INTERNATIONAL PADEL FEDERATION AND PREMIER PADEL.

This next-generation synthetic grass system combines XNOVA, XOMEGA, and XDELTA textured monofilaments.

XNOVA monofilaments, with a parallelepiped shape that includes asymmetrical grooves and ribs, have a thickness of 170 microns.

XOMEGA filaments have a semicircular structure with a thickness of 200 microns, while XDELTA filaments have a triangular shape and a thickness of 200 microns.

These filaments, specially designed and produced by Mondo to meet padel's needs, are characterized by silica sand infill.

FREQUENTLY ASKED QUESTIONS

FAQS

Manufacturing of the Courts: [The process and certifications](#)

Start a Padel Club: [Licenses and permits](#)

Installation of the Courts: [2-3 days](#)

MANUFACTURING

FAQS

Our courts are ready in 4 weeks

At our manufacturing facility located in Crevillente, Spain, we comprehensively carry out all production processes. Order processing begins from the conceptual stage, with a lead time of 4 weeks, ensuring strict compliance with both national and international certifications.

Our commitment to quality is reflected in the exclusive use of galvanized steel for the construction of all our structures. Additionally, we apply an epoxy paint coating to enhance durability and resistance to adverse conditions. For even more comprehensive protection, we offer the option of priming the structures, strengthening their resistance and extending their lifespan.

CERTIFICATIONS

Our courts have the Certificate of conformity of factory production control ES24/00000034. In compliance with UNE-EN 1090-1:2011+A1:2012

As well we comply with the ISO 14001, demonstrating that we carry out our production in terms of environmental matters by promoting the protection of the natural environment and the prevention of pollution.

An ISO 9001 QMS documents the processes, procedures, and responsibilities for achieving quality policies and objectives. Based on seven quality management principles, the ISO 9001:2015 standard defines the way an organization operates to meet the requirements of its customers and stakeholders

LICENCES AND PERMITS NEEDED TO BUILD A PADEL COURT

FAQS

The permits required may vary depending on the location in which the court or club is built, but some of the common permits are as follows:

Building permit: It is necessary to obtain a building permit from the corresponding town hall. This permit must be requested by a competent architect or technician and must include the plans and technical specifications of the work.

Activity license: Once the court has been built, it is necessary to obtain an activity license in order to operate the padel court. This license is obtained from the corresponding municipality and must comply with certain technical and safety requirements.

Permit for electrical installation: You need to have halogen-free wiring and a permit to prove it.

Sanitary registration: If bar or restaurant services are to be offered at the facility, a sanitary registration must also be obtained. This registration is obtained through the Ministry of Health and must comply with certain requirements related to food hygiene and safety.

Civil liability insurance: It is mandatory to take out civil liability insurance to cover possible damages that may be caused to third parties in the facility.

Minor works license: If minor alterations are to be made to the facility, such as repairs or changes of furniture, a minor works license must be obtained from the corresponding local council.

SHIPMENT AND INSTALLATION

FAQS

What Incoterms do we use?

CIF and CFR for sea shipments around the World. For our USA and Canada Customers we deliver DDP, a turn-key service with our North America installation team.

How many padel courts fit in a container? How do I make my investment more profitable?

To ensure the profitability of an investment, numerous factors must be considered. However, at MejoSet, we recommend calculating the metrics on a per-shipping-container basis for international shipments. It's important to note that the typical capacity per container is three courts, although this doesn't apply to the X-Treme model. In the case of courts featuring monofilament turf, only two courts will fit in a container due to the additional space required for sand. The average estimate for a club is 4 to 6 courts, which would mean up to 2 containers.

Additionally, it's worth mentioning that up to four courts can be loaded into a container without including the sand, with the crystals packaged in wooden boxes.

What are the installation options?

We can offer you 2 options to establish your courts: Installation with MejoSet's team (3-4 people) so the installation is done in 2 to 3 days, or installation with a MejoSet supervisor, who will guide your own local team of installers following our instructions to achieve the best result.
